

## Task 1 -

Reproduce the following table using CSS positioning (relative or absolute) instead of <table>.

Column 1	Column 2	Column 3
A numbered list:  1. Able 2. Baker 3. Charlie 4. Delta 5. Echo	B	C
	An unnumbered list:  • Pounds • Dollars • Euro • Yen • Roubles	

Refer the following sample.

```
<html>
<head>
<style>
div.blue1 {width:100px;height:200px;background-color:blue;
           border-style:none;
           position:relative;left:0%;top:0px;}
div.yellow1 {width:100px;height:150px;background-color:yellow;
            border-style:none;
            position:relative;left:100px;top:-200px;}
div.red1 {width:100px;height:150px;background-color:red;
          border-style:none;
          position:relative;left:200px;top:-350px;}
div.green1 {width:200px;height:50px;background-color:green;
            border-style:none;
            position:relative;left:100px;top:-350px;}

</style>
</head>
<body>
<div class = "blue1"></div>
<div class = "yellow1"></div>
<div class = "red1"></div>
<div class = "green1"></div>
</body>

</html>
```

## Task 2 -

Write the appropriate CSS to change the presentation of the webpage to that shown in figure below. The new page layout includes a header section, two columns (one for navigation menu and one for the main content) and a footer section.

The colours used are as follows:

- Text: #330000
- Body background: #00BFFF
- Header and footer background: #ccaa66
- Left (navigation) column background: #E8D882
- Right (main content) column background: #f1e8b0

The text is displayed in "Verdana" font.

## Task 3- Create the following layout by HTML AND CSS
